| Subject | Keywords | Provided to |
| Class III luminaire with reduced cross-sectional area | Class III, §5.4 | ETF 5 |
| Question | | |
| For a class III luminaire (for example a recessed spot) the wiring has a section smaller than 0.4mm ² . Q1: Is this allowed? LED driver isn't included with the luminaire. | | |
| Decision | | |
| For constant current supply , no problem with the §5.4 since it will not change the current in any condition. For constant voltage , the manufacturer shall specify in the instruction sheet the specific type control gear(s) to be used The control gear(s) has(ve) to be available on the market . This control gear will be used for further testing of the luminaire | | |
